

Bitcoin's explosive moves are giving numerous opportunities to exploit!

--

Despite their extreme volatility, cryptocurrencies have been shown to provide secure cross-border transactions at a lower cost and time due to the lack of a regulatory agency. However, this digital asset is directly related to several exogenous variables. Most importantly, Elon Musk's tweets are nowadays monitoring prices and trends. [More bubbles could be observed to any major event, for both bullish or bearish directions.](#)

Recently, BTCUSD skyrocketed and achieved more than 60,000\$ in April 2021. Following the news, today bitcoin is trading at nearly 40,000\$. This volatility created several mispricing opportunities, trading strategies, and tailored investment studies. Added to that, cryptocurrencies enlarge the palette of assets by launching Futures Contract, which improved market efficiency once again.
