

# The strategic plan behind the Fund of Funds performance!

--

Fund of Funds is globally distinguished from other portfolios for its diversification advantage. It actually offers the opportunity to combine Mutual funds, Hedge funds, Private equity ... in a single portfolio. Diversification motivates risk-averse investors by absorbing losses and exposing their return to a wide range of assets.

This type of investment tends to offer opaque disclosure regarding the asset classes included in the funds. The key success of Fund of Funds is the selection criteria used and the plan developed for rebalancing/restructuring. Several strategies were implemented and compared to the Barclays FoF Index benchmark in order to maximize the return while managing the fund's weights and rebalance strategies.

FOF is considered a painless way to break into a crowded hedge fund industry. Vifco provides the expertise to optimize your portfolio selection, making it outperforming the market's Benchmark and apply knowledgeable stress tests to anticipate long term unexpected trends. Contact us for our visionary approach!

We assist investment firms and asset managers in building suitable investment philosophy, decision making process and risk management tools, researching and selecting the best funds and managers to deliver out of the box performance, we also them assessing the best strategy review process to maintain good FoF ranking.
